

HARDIK MALVIYA

Product Designer · UI / UX

Bengaluru, India | hardikmalviy@gmail.com | colehardik.in | [LinkedIn](#) | [X](#) / [Twitter](#)

SUMMARY

Product designer with two years of experience taking web and mobile products from research and wireframes to high-fidelity UI and motion, then shipping them live using AI development tools without waiting on an engineering queue. Works end to end across product, marketing, and design systems, with a bias toward minimal, user-centred interfaces that serve clear business goals. Currently designing for New York clients at Parallel Studio.

EXPERIENCE

Product Designer, Parallel Studio Jul 2026 to Present
New York, United States · Remote

- Design product and marketing work for New York based clients, most of it under NDA, spanning finance, consumer apps, and brand sites.
- Lead design for Flex, a finance product, including a fee transparency section that explains membership, processing, and split fees in plain language rather than fine print.
- Design app screens for Skye, a UI widget app for Apple devices, working inside the product rather than only on its marketing surfaces.

Product Designer, BRICX Oct 2025 to Aug 2026
Remote

- Designed marketing sites and landing pages for client brands, defining hero systems, motion behaviour, and fully responsive auto-layout structures.
- Owned design-to-build handoff, specifying type, spacing, and interaction detail so shipped builds matched the design at pixel level.

UI/UX Designer, SilverXis Inc. (Internship) Jul 2025 to Sep 2025
India · On-site

- Designed a range of client websites, mostly traditional business sites rather than SaaS products, covering layout, navigation, and visual system.

Jr. UI/UX Designer, 4TYSIX App Labs Jan 2025 to Mar 2025
Ahmedabad, India · On-site

- Delivered three mobile app and website projects end to end across a multi-project client workload.
- Built advanced Figma craft including component systems, auto-layout, and prototyping, alongside hands-on UX and interaction problem-solving.

SELECTED WORK

Convo (personal project, in progress) convo-agent-steel.vercel.app
An embeddable AI video-agent widget for websites, paired with a multi-tenant dashboard for the teams running it. Designing and building it solo: widget experience, live configuration settings, conversation history, and lead capture views.

Parallel Studio Website studio.useparallel.com
Designed and shipped the studio's own marketing site, covering layout, type system, motion behaviour, and live deployment.

Personal Portfolio colehardik.in
Designed in Figma, then built and shipped independently, with custom smooth scrolling, a cursor-reactive interactive hero, and an auto-rotating testimonial system, deployed on a custom domain.

SKILLS

Design	Product design, UI design, interaction design, UX research, wireframing, prototyping, design systems, visual design, motion and micro-interaction, responsive layout
Building	Ships live websites and products end to end using Framer and AI development tools, covering design through deployment without a separate engineer
Tools	Figma, Framer, Claude, ChatGPT, Midjourney, Higgsfield, GitHub, Vercel

EDUCATION

Bachelor of Commerce (B.Com), Marketing 2023 to 2026
Shree Narayana College of Commerce, Gujarat University, Ahmedabad, India
